

EKSMA Optics is a premier manufacturer and global supplier of precision components for laser and photonics applications. We specialize in high-power laser optics, including nonlinear and laser crystals, with advanced polishing for flat, spherical, and aspherical substrates across various glass types. Our expertise in IBS and E-Beam IAD coating technologies is industry-proven, including wins in the HiLASE laser damage challenges in 2023 and 2024. The portfolio includes high-end electro-optics, such as BBO/KDP Pockels cells with drivers. All products undergo stringent quality control and can be fully tested for durability according to ISO or MIL standards. Manufactured in Europe, our solutions ensure high production standards and reliable supply for partners across industrial, aerospace, defense, and advanced research applications.
